

AQMD WAREHOUSE RULE 2305 COMPLIANCE REQUIREMENTS

DO NOT MISS THE DEADLINE

After an extensive public and boards review process, AQMD Rule 2305 requiring warehouse of 100,000 SF or greater with minimum storage area of 50,000 SF to reduce NOX & PM emissions or pay annual emissions fee, was **adopted on May 7**. Although, based on the size of the warehouse, the rule allows 2 to 3 years to implement the compliance requirements, the facility owner and operator need to start planning now. **An initial site notification must be submitted to AQMD by September 1**, specifying the general information on the property and the operation, or operations, as well as measures that will be taken to achieve compliance with the AQMD requirements.

If, you are interested to have a free consultation meeting with our team of experts, or need a quote to comply with Rule 2305 requirements, Please call our office or fill this form, and email it to Sharie Isles at sierraeng6@gmail.com, or mail it back to our address shown below.
